DUMMY DOCUMENT — DESIGNATED SYNTHETIC TESTS ONLY

LOKD client terms
Test placeholder

Version: LOKD-DUMMY-TERMS-2026-09-24-v1
Date: 24 September 2026

The owner authorised this dummy file for integration testing on 24 September 2026. It is a test artifact, not the final LOKD customer terms.

1. Test scope

Use only with a clearly labelled synthetic client, quote and order. The linked quote supplies the test scope, amount and currency.

2. Test acceptance

The designated client reviews this exact file and the linked quote, then selects the acceptance checkbox. The system must record the file version, hash, quote revision and accepting identity.

3. Changes and cancellation

Use revisions, expiry, withdrawal and cancellation to test that obsolete quotes cannot be accepted and that existing evidence remains traceable.

4. Payment and service boundary

Acceptance of this test artifact must not authorise a real charge, real invoice, funding or service deployment. Payment-provider tests use test mode only. Independent review and existing application controls remain applicable.
